

# ReACT Enterprise

ReACT Enterprise allows a near real-time view of your organization's sales, staffing, and customer traffic through the EKG (Enterprise Knowledge Grid) executive dashboard. The information is presented graphically, giving an overview of your organization's performance. This allows you to make critical and timely business based on current information.

## Features

- Windows-based, .NET architecture
- Multi-store, multi-user, multi-tasking
- Reports live multi-store data such as sales by hour, customer traffic by hour, and employee productivity.
- Top-level graphical view with drill-down capability
- Support for web-feed for Internet (or Intranet) data (ex. weather conditions)
- Flexible querying and reporting
- Next generation tool
